

Circus Kinetica are an award winning, Sussex based Arts collective whose experimental approach, unique aesthetic and affinity for the unusual have earned them considerable acclaim both in the UK and abroad. Founded by Brighton University graduates James Caldicott and Samuel Apley in 2008, Circus Kinetica has its roots in the festival arts scene (both cultural and musical) where they gained a reputation with their wind powered installations and interactive, large-scale event sculptures.

Working within a widely diverse remit, from Public Art to jewellery to prop making to vehicle customisation, they have developed a language of construction that permeates all that they do and makes their work (regardless of scale) unmistakable to their audience and collectors. Their work is driven by a series of obsessional interests including recycled/found materials, renewable/unusual power sources and reactivity to nature, as well as a constantly unfolding curiosity and a certain lighthearted frame of mind, that manifest themselves in a body of work that appears, at the same time both current and of a pre-digital, industrial age.

The Dis Organ - Mode - London 2014

Arachna-Furniture

www.circuskinetica.com

The “Arachna-furniture” provide comfortable, stylish and eccentric seating solutions for any event, indoors or out. Inspired by the work of people such as Tim Burton, Louise Bourgeois, and La Machine, these pieces bring a fantastical, fairy-tale ambience with them wherever they are used. Optional rain/sun canopy for outdoor use.

The Tower Of Fable

www.circuskinetica.com

The “Tower of Fable”, cousin to the famous “Kinetica Brothers’ Mechanical Punch Bar” is a captivating self-contained water installation of a scale that demands attention. It can either be a stand-alone feature or be used in conjunction with the “Punch Bar” and has optional bespoke, fitted timber benches, turning it into a sculptural seating solution.

The Kinetica Stage

www.circuskinetica.com

The “Kinetica Stage” is the last word in boutique performance spaces.

This breath-taking piece of temporary architecture uses a combination of low impact materials such as bamboo and Pakistani canvas. Making it a visually striking and sustainable choice for any event.

Its uncompromising aesthetic flare including its impressively cantilevered “floating canopy make the Kinetica stage a centre point to any arena that will stand out, draw a crowd, frame and celebrate every performance.

The stage foot print is 8x5m overall allowing for steps.

The performance space is 6x4m usable stage area.

Previously events include:

Love Box Festival.
Secret Garden Party Festival
The London Mela, Global Local
The Royal Jubilee, Hyde Park, Alfresco Stage.
